About

I am a software developer with comprehensive experience in both front-end and back-end technologies. I build web applications using modern front-end technologies such as React.js, Next.js, Vue.js, and Blazor, primarily working with TypeScript and JavaScript. On the back-end side, I work with .NET, NestJS, and C#. I have experience with database systems including PostgreSQL, MS SQL, and SQLite. In DevOps processes, I create CI/CD pipelines using GitHub Actions and Docker. Additionally, I have experience developing cross-platform desktop applications with Electron.js and .NET MAUI.

Experience

Mekanet Enerji Otomasyon   İzmir
Software Developer   10/2024 - 09/2025

I played an active role in relaunching the company's corporate website by redesigning and rebuilding it from scratch with modern front-end technologies. I built a high-performance, responsive, and maintainable stack using Next.js, TypeScript, and Node.js. In addition, I served as a Full-Stack Developer on a Web-Based HMI (Human Machine Interface) platform tailored for energy automation systems. In this project I developed core modules such as real-time data monitoring, user authorization, and alarm management using React.js on the front end and Nest.js on the back end. I also handled DevOps operations throughout the project.

Boru Hatları İle Petrol Taşıma Anonim Şirketi (BOTAŞ)   Ankara
Software Developer (Intern)   07/2022 - 08/2022

During my internship I worked on an Android application project focused on AI and computer vision. I developed on mobile with Kotlin; I worked on image processing with OpenCV and AI model integration using TensorFlow Lite and Google ML Kit.

Education

Gazi Üniversitesi   Associate Degree
Computer Programming   Ankara • 08/2019 - 06/2022

Throughout my studies I reinforced object-oriented programming (OOP) and algorithmic thinking through hands-on projects in C# and Java. At the data layer I gained proficiency in relational database design and T-SQL querying using MS SQL Server. This process built a strong technical foundation for adapting to modern software architectures.

Skills

C#, TypeScript, JavaScript, Python

React, Next.js, Vue, Blazor

.NET, NestJS, NodeJS, BunJS

PostgreSQL, MS SQL, SQLite, InfluxDB

GitHub Actions, Docker
