About Me

I follow modern software development practices and focus on building sustainable, user-oriented solutions. Problem-solving, continuous learning, and quickly adapting to new technologies are important parts of my approach to software development.

I actively use AI tools for research, analysis, debugging, refactoring, and developing alternative solutions. I follow new technologies and approaches and keep my technical knowledge up to date by developing open-source and personal projects.

Work Experience

- Mekanet Enerji Otomasyon**İzmir, Türkiye
Full Stack DeveloperEkim 2024 - Eylül 2025
- Led the redesign and development of the company's corporate website using Next.js, TypeScript, and Node.js, building a high-performance, responsive, and maintainable architecture.
 - Worked as a Full Stack Developer on the development of a web-based HMI/SCADA platform for energy automation systems.
 - Developed frontend applications with React.js and backend services with NestJS, implementing real-time data monitoring, user authorization, and alarm management modules end to end.
 - Managed DevOps operations including CI/CD pipeline setup with GitHub Actions, Docker containerization, and deployment automation.

- Boru Hatları İle Petrol Taşıma A.Ş. (BOTAS)**Ankara, Türkiye
Software Developer InternTemmuz 2022 - Ağustos 2022
- Contributed to an Android application development project focused on artificial intelligence and image processing, developing the mobile application with Kotlin.
 - Implemented image processing with OpenCV and integrated AI models using TensorFlow Lite and Google ML Kit.
 - Gained hands-on experience in the mobile development lifecycle and AI/ML model deployment.

Education

- Gazi Üniversitesi**Associate Degree
Computer ProgrammingAnkara, Türkiye • Ağustos 2019 - Haziran 2022
- Developed practical projects in Object-Oriented Programming (OOP) and algorithm design using C# and Java.
 - Gained proficiency in relational database design and T-SQL querying with MS SQL Server.
 - Built a strong technical foundation for adapting to modern software architectures.

Military Service

I completed my military service in November 2025.

Yetenekler

Programming Languages

C#, TypeScript, JavaScript, Python

Front-End

React.js, Next.js, Vue.js, Blazor, HTML5, CSS3

Back-End

.NET, NestJS, Node.js, BunJS, REST API

Databases

PostgreSQL, MS SQL Server, SQLite, InfluxDB

DevOps & Tools

GitHub Actions, Docker, CI/CD, Git

Cross-Platform

Electron.js, .NET MAUI

Certifications

Frontend Developer (React)
