About Me

Full Stack Developer with end-to-end experience in front-end and back-end technologies. I develop high-performance, user-focused web applications using modern front-end frameworks such as React.js, Next.js, Vue.js, and Blazor, along with TypeScript and JavaScript. On the back-end, I design scalable APIs and services with .NET, NestJS, and C#, and work with PostgreSQL, MS SQL Server, and SQLite database systems. I manage DevOps processes by setting up CI/CD pipelines with GitHub Actions and Docker. I also have experience developing cross-platform desktop applications with Electron.js and .NET MAUI.

Work Experience

Mekanet Enerji Otomasyon

Izmir, Turkey

Full Stack Developer

October 2024 - September 2025

- Led the redesign and development of the company's corporate website using Next.js, TypeScript, and Node.js; built a high-performance, responsive, and maintainable architecture.
- Worked as a Full Stack Developer on the development of a Web-Based HMI/SCADA platform for energy automation systems.
- Developed real-time data monitoring, user authorization, and alarm management modules end-to-end, building the front-end with React.js and the back-end with NestJS.
- Managed DevOps operations including CI/CD pipeline setup with GitHub Actions, Docker containerization, and deployment automation.

Boru Hatları İle Petrol Taşıma A.Ş. (BOTAS)

Ankara, Turkey

Software Developer (Intern)

July 2022 - August 2022

- Participated in an Android application development project focused on artificial intelligence and image processing; developed the mobile application using Kotlin.
- Performed image processing with OpenCV and integrated AI models using TensorFlow Lite and Google ML Kit.
- Gained hands-on experience in the mobile development lifecycle and AI/ML model deployment.

Education

Gazi University

Associate Degree

Computer Programming

Ankara, Turkey • August 2019 - June 2022

- Developed hands-on projects in Object-Oriented Programming (OOP) and algorithm design using C# and Java.
- Gained competency in relational database design and T-SQL querying with MS SQL Server.
- Built a strong technical foundation for adapting to modern software architectures.

Skills

Programming Languages: C#, TypeScript, JavaScript, Python

Front-End: React.js, Next.js, Vue.js, Blazor, HTML5, CSS3

Back-End: .NET, NestJS, Node.js, BunJS, REST API

Database: PostgreSQL, MS SQL Server, SQLite, InfluxDB

DevOps & Tools: GitHub Actions, Docker, CI/CD, Git

Cross-Platform: Electron.js, .NET MAUI
